GOVERNED INSPECTOR STATE MATRIX

Evidence changes decision, visible encoding, export, and next action as one coupled state.

	Evidence state	Decision	Export consequence	Remediation
01	Lexical only	**REFUSE semantic**	Undirected fallback	Add matched annotation
02	Matched positive	**ADMIT equivalence**	Undirected semantic	No remediation
03	Negative evidence	**REFUSE positive**	No semantic relation	Inspect counterevidence
04	Bootstrap missing	**REFUSE stability**	No stability claim	Run cluster bootstrap

The requested claim remains attached to every fallback or blocked export; no stronger semantics are silently substituted.
